Testing Persona Logic

Why Persona-Driven AI Changes Everything

68%

Abandonment Rate

Users who leave AI tools when responses feel irrelevant to their role

3x

Higher Engagement

When AI adapts output format to the user's role

45s

Executive Attention

Avg. time an executive spends reviewing a dashboard

23m

Analyst Deep Dive

Avg. time a BI analyst spends per question or investigation

The Two Core AI-BI Personas

The Analyst

Goal

Find root causes & anomalies

Time

20–60 minutes per analysis

Output

Detailed tables, drilldown charts

Language

Business and technical terms

AI Need

Full data with statistical context

The Executive

Goal

Quick pulse on business health

Time

30–90 seconds per question

Output

Summary, 1–3 stats, single chart

Language

Business outcomes only

AI Need

3-bullet insight + recommended action

The Full Persona Spectrum at Cvent

Event Planner

Focus: Logistics & execution

Is my event on track?

AI Format: **Status cards + alerts**

BI Analyst

Focus: Deep data investigation

What caused the drop?

AI Format: **Full tables + drill-down**

Sales Director

Focus: Revenue & pipeline

Are we hitting quota?

AI Format: **KPI dashboard + forecast**

C-Suite Exec

Focus: Strategic overview

How are we growing?

AI Format: **3-bullet + single chart**

IT / Engineer

Focus: System performance

Are there data issues?

AI Format: **Technical logs + queries**

Deep Dive: The Analyst Persona

Alex — Senior BI Analyst

Cvent Platform Team • SQL, Python, Tableau

Primary Output

Sortable, filterable data table — all columns

Chart Type

Scatter plots, multi-series line, heatmaps

Context Level

Full: SQL query, data lineage, row counts

Follow-up

3 drilldown queries suggested per finding

Export

CSV download button always visible

Deep Dive: The Executive Persona

Sarah — VP of Product

Cvent Enterprise • Email, Slack, Slides

Primary Output

3-bullet executive summary, max 2 lines each

Chart Type

Single large KPI number or simple bar chart

Language

Plain English — zero SQL, zero jargon

Action

1 recommended next action at the bottom

Never Show

Raw data, SQL, row counts, or tables

Same Question, Radically Different Answers

 Question: "How did our virtual events perform last quarter?"

Analyst Response

Virtual Event Performance — Q3 2024 vs Q3 2023

- Total events: 312 virtual (↑ 8% YoY)
- Avg registrations: 287 per event (↓ 4% YoY)
- Completion rate: 62% (↑ 3% vs Q2)
- Top performer: TechSummit Live — 4,200 attendees
- Statistical outlier: Events >2hrs had 22% lower completion ($p < 0.05$)
- Recommended drill: Segment by `event_type = 'webinar'` vs `'conference'`

Executive Response

Virtual Events: Strong Growth, Minor Dip in Engagement

- Volume up 8% — scaling successfully
- Engagement slightly softer — avg attendance down 4%
- Action: Review event duration — shorter formats perform better

  **Bottom line:** Growth on track. Optimize for engagement.

Implementing Persona Profiles in Snowflake

01

Table Design

```
CREATE TABLE user_personas (user_id, role, preferred_viz, context ARRAY)
```

02

Role Lookup

JOIN to Snowflake's `USER_ROLES` view to auto-detect access level for initial persona assignment

03

Override Flag

Allow users to set `preferred_persona` manually via UI settings

04

Refresh Trigger

Re-resolve persona on each session start — not per query — to avoid mid-conversation context shifts

05

Audit Trail

Log `persona_used` alongside every query for compliance and A/B testing

06

Multi-Tenant

Persona definitions customizable per enterprise org account for Cvent clients

A low-angle, upward-looking photograph of several modern skyscrapers with glass facades. The image is overlaid with a semi-transparent dark grey horizontal band across the center. Three solid red rectangular blocks are positioned: one at the top center, one at the bottom right, and a smaller one on the left side below the text. The text 'THANK YOU' is centered within the dark band in a white, bold, sans-serif font.

THANK YOU
